
Tipps Excel Text Translator

If you can't store an API Key in the tool:

If you enter an API Key and the API Key is not saved after reopening the dialogue box, the cause may be the following:

- You have opened / double-clicked the tool directly from the ZIP file supplied: In this case, please unpack the ZIP file properly and save the AddIn in the described folder. Please note that Excel must be closed during this process.

- For security reasons, access to the file is still protected: Click with the right mouse button on the AddIn file and select "Properties". Then confirm access to the file. Excel must be closed.
