Setup REVERSE-PIVOT

After buying, or after downloading the testversion, you have several Excel-files.

Normally one of them is for the right usage:

1. Budgetplanner_Demo.xlam or Budgetplanner.xlam
2. Beispiel.xlsx

No 1 is the AddIn file for usage, wirh a 32 Bit Excel Version

No 2 is is an example file

PLEASE NOTE: it depends on the Bit Version of your OFFICE System – not of your Windows system

<u>There are three ways to run Excel-Image-Importer:</u>

1. Open Excel and one Workbook and then doubleclick the AddIn file. Then you have the ribbon bar of Excel-Image-Importer.
   This could be the right way, if you use the AddIn sporadically.
2. Open Excel, goto to the Options and choose AddIns and then Excel-AddIns to add the AddIn file to your AddIns. Then you will see the Excel-Image-Importer ribbon bar every time you use Excel
3. Press the windows button on your keyboard and type „%appdata%“ . Then the explorer will open. Goto to MICROSOFT then to EXCEL an then to XLSTART. Copy the AddIn file in this folder. Please note: Excel has to be closed during this operation. Then you will see the Excel-Image-Importer ribbon bar every time you use Excel.

<u>Language:</u>

This AddIn is in German language
